

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	13 March 2026
Team ID	69c0f2dd43b2af737d05d770
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	4 Marks

Functional Requirements

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	- Registration through ServiceNow form - Registration using Gmail account - Registration using LinkedIn account
FR-2	User Confirmation	- Confirmation via Email - Confirmation via OTP (One-Time Password)
FR-3	Book Request Submission	- User can request a book through the system - Add required details: Book Name, Author, ISBN, and Preferred Pickup Date - Submit request for approval workflow
FR-4	Approval Workflow	- Librarian receives request for approval - Approve or Reject request - Notify user of approval status via email and ServiceNow notifications
FR-5	Book Issuance & Tracking	- Track book issuance date, return date, and current status - Generate reminders for overdue books - Maintain history of user requests and issued books
FR-6	Reporting & Analytics	- Generate reports for book requests, approvals, and overdue books - Dashboard for library admin to monitor workflow efficiency

Non-functional Requirements

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should have a user-friendly interface for both students and library staff. Easy navigation and minimal learning curve.

NFR-2	Security	All user data and request details must be secured with authentication and authorization controls. Ensure compliance with data privacy standards.
NFR-3	Reliability	System should provide accurate processing of book requests and notifications without failure. Minimal downtime is expected.
NFR-4	Performance	The system should handle multiple concurrent requests efficiently without delays. Page load and workflow response times should be under 3 seconds.
NFR-5	Availability	The platform should be available 24/7 with scheduled maintenance windows notified in advance.
NFR-6	Scalability	The system should support future expansion including more users, additional libraries, and increased book inventory without performance degradation.
NFR-7	Maintainability	Easy to update workflows, add new features, and maintain the system with minimal effort.
