| Maximum Marks |                                              |

### Project Overview

**Project Name:** Smart Library Request Workflow in ServiceNow

**Project Description:** A workflow system to manage library book requests, approvals, and notifications in ServiceNow, including dashboards and reports for administrators and users.

**Project Version:** 1.0

**Testing Period:** 18 February 2025 to 21 February 2025

### Testing Scope

#### Features/Functionalities to be Tested:

- User login and role-based access
- Borrow Request creation, submission, and validation
- Approval workflow for librarians
- Notifications for request updates
- Dashboard visualizations and reports
- Data filtering and calculation fields

#### User Stories / Requirements to be Tested:

- As a user, I can submit a borrow request for a book.
- As a librarian, I can approve or reject requests.
- As a user, I receive notifications for request status.
- As an admin, I can view reports and dashboards summarizing book requests.

### Testing Environment

**URL/Location:** [ServiceNow instance URL]

**Credentials:**

- **Username:** testuser
- **Password:** Test@123

.

**Test Cases:**

| Test Case ID | Test Scenario             | Test Steps                                                                                                   | Expected Result                                        | Actual Result | Pass/Fail |
|--------------|---------------------------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|---------------|-----------|
| TC-001       | User Login Validation     | 1. Navigate to login page<br>2. Enter valid credentials<br>3. Click Login                                    | User logs in successfully                              |               |           |
| TC-002       | Borrow Request Submission | 1. Navigate to Borrow Request form<br>2. Select Book from list<br>3. Enter Request Date<br>4. Submit request | Request is created and status shows "Requested"        |               |           |
| TC-003       | Approval Workflow         | 1. Login as librarian<br>2. Open pending requests<br>3. Approve or reject requests                           | Request status updates to Approved/Rejected            |               |           |
| TC-004       | Notifications             | 1. Submit a request<br>2. Check user notification<br>3. Approve request as librarian                         | User receives notification for submission and approval |               |           |
| TC-005       | Dashboard & Reports       | 1. Open dashboard<br>2. Check visualizations: Total Requests, Requests by User, Pending Approvals            | Dashboard displays correct data and visualizations     |               |           |
| TC-006       | Data Validation           | 1. Submit request with missing Book Name or invalid date<br>2. Submit                                        | System shows error and prevents submission             |               |           |

**Bug Tracking:**

| Bug ID | Bug Description                           | Steps to Reproduce                                                                      | Severity | Status | Additional Feedback                                   |
|--------|-------------------------------------------|-----------------------------------------------------------------------------------------|----------|--------|-------------------------------------------------------|
| BG-001 | Notification not sent on request approval | 1. Submit borrow request<br>2. Approve as librarian<br>3. Check user email/notification | Medium   | Open   | Ensure notification settings are configured correctly |

|        |                                                             |                                                                               |      |             |                                                      |
|--------|-------------------------------------------------------------|-------------------------------------------------------------------------------|------|-------------|------------------------------------------------------|
| BG-002 | Dashboard shows incorrect total count for approved requests | 1. Approve multiple requests<br>2. Open dashboard<br>3. Compare request count | High | In Progress | Verify calculation field for total approved requests |
| BG-003 | Error message not displayed for missing Request Date        | 1. Leave Request Date empty<br>2. Submit request                              | Low  | Closed      | Validation logic updated to show error               |

**Sign-off:**

Tester Name: [Name of Tester]

Date: [Date of Test Completion]

Signature: [Tester's Signature]

**Notes:**

- All test cases include both **positive and negative scenarios**.
- Detailed bug tracking includes **severity, status, and steps to reproduce**.
- Feedback from testers should be documented for improvements.

**Project Manager and Product Owner approval** required before deployment.
